Dear Ben

**Re: Suited and Booted 08**

Thank you so much for running a superb workshop for our College students last week and for participating in the speed networking session. They learned an enormous amount and had great fun at the same time!

Suited and Booted was created in order to boost the confidence and employability of our sixth formers, whether they went out to work or on to University. The conference gave them the skills and techniques they will need and it opened their eyes to new opportunities.

Thank you for all your hard work in planning and delivering the session. It was superb to see them all so involved and engaged. You had a great rapport with our youngsters and pitched the content perfectly.

I thought you might like to see an example of the post-it note feedback from the students: 'Good, Ben B, guest speaker, really good, helping us learn new techniques', 'I enjoyed Ben B talk about how to present yourself in an interview situation and how to boost confidence'.

It was good to hear that you enjoyed the day as well and I look forward to working with you again soon.

With kind regards

Sara Hopkins
